MUHAMMAD HABIBILLAH

IT Support Specialist | Junior IoT and Mobile Dev | Learner

Jakarta, Indonesian| alxnderneurvoe.carrd.co | mhabibillah2303@gmail.com

ABOUT ME

A graduate of the Computer Network Engineering Technology program under the Department of Information and Computer Technology. With over 4 years of professional experience in the technology sector, specializing in networking and software development. Demonstrates strong analytical skills, adaptability, and a passion for leveraging technology to create efficient and innovative solutions.

SKILLS

IT Support, IT Operations, Microsoft 365, Google Workspace, Windows & macOS Administration, Network Administration, Remote Support, Hardware & Software Troubleshooting, Asset Management, Database Administration, Basic Python, Basic Flutter, Analytical Skills, Problem Solving.

EDUCATION

Lhokseumawe State Polytechnic (Sept 2021 – Sept 2025)

Associate Engineering GPA 3.54/4.00

- Majoring in Information and Computer Technology, Focusing in Network Computer Engineering Technology.
- Have completed final semester assignments such as :
  - Design of IoT-based Smart Lock Dock prototype (Dec 2021)
  - Design of IoT based Plant Watering System prototype (June 2022)
  - Designing a Service Workshop Application using Flutter based on Firebase (Sept 2023)

EXPERIENCE

Caliana *(Powered by Data Nusantara Adhikarya)*

Operational and IT (Jun 2026 – Dec 2026)

- Provide technical support for Windows and macOS devices, including hardware and software troubleshooting.
- Install, configure, and maintain end-user devices, business applications, and peripherals.
- Perform user account setup, software deployment, and device onboarding/offboarding.
- Resolve incidents and service requests while ensuring compliance with company IT policies.
- Support IT asset management, ISO 27001 documentation, and preventive maintenance.

PT Semesta Sistem Solusindo

Operational and IT (Jan 2025 – Jun 2026)

- Monitored server and infrastructure availability to ensure system reliability.
- Assisted in troubleshooting Linux servers, hosting services, and network-related issues.
- Supported system deployment, server maintenance, and operational documentation.

IT Support Technician (Aug 2024 – Dec 2024)

- Installed, configured, and maintained desktop computers, laptops, printers, and peripherals.
- Diagnosed and resolved hardware, software, and network connectivity issues.
- Performed preventive maintenance and operating system installations.

PT Iweka Digital Solution

Internship (Feb 2024 – Jul 2024)

- Monitored server and infrastructure availability to ensure system reliability.
- Assisted in troubleshooting Linux servers, hosting services, and network-related issues.
- Supported system deployment, server maintenance, and operational documentation.

Bramono Advertising

Technical Engineer (Mar 2021 – Sept 2023)

- Typing, creating, and working on several projects with Microsoft Office.
- Provided technical support for computers, printers, photocopiers, and office equipment.
- Installed, configured, and maintained Windows operating systems and productivity software.
- Diagnosed and resolved hardware and software issues to minimize downtime.
- Managed document processing, reporting, and administrative tasks using Microsoft Office.
- Edited, prepared, and printed marketing materials according to client requirements.
- Performed preventive maintenance to ensure optimal performance of office devices.

PROJECTS

IOT

Design of IoT-based Smart Lock Dock prototype (Dec 2021)

Description :

Designed and developed an IoT-based Smart Lock Door prototype as part of a team project completed within two months. The system was built to enhance access security for houses, apartments, and office rooms by enabling real-time remote monitoring and control through the Blynk application. The prototype supports CRUD operations and IoT-based device management.

Design of IoT based Plant Watering System prototype (June 2022)

Description :

Collaborated with a team to design and develop an IoT-based Automatic Plant Watering System prototype, completed within three months. The system automates irrigation based on predefined conditions and enables real-time monitoring and control through the Blynk application. The project implemented CRUD functionality for efficient device and data management.

MOBILE APPLICATION

Service Workshop Application Design Using Flutter Based On Firebase (June 2023)

Description :

Designed and developed a full-stack mobile application for vehicle service workshop management using Flutter and Firebase, completed independently within five months. The application allows customers to book service appointments online without visiting the workshop in person. Key features include user authentication via email, phone number, Google, and Facebook, as well as CRUD functionality for service booking and user management. The application is continuously being enhanced with additional features to improve functionality and user experience.

CERTIFICATION

Digitalent Scholarship

Student Intern (July 2022 – August 2022)

- Learn an introduction to network simulators.
- Designing network topology and network addressing.
- Collect the technical needs of users using the network.
- Determine network device specifications.
- Installing a wireless network.
- Configure switches on the network.
- Configure routing on network devices in autonomous and between autonomous systems.

LSP Informatika

Junior Network Administrator (August 2022)

- Designing network addressing.
- Installing a wireless network.
- Configure switches on the network.

ORGANIZATION

Polytechnic Linux Community

Staff of Caderization (May 2022 – June 2023)

- Planning the future regeneration of the Polytechnic Linux Community.
- Improving the quality and skills of Polytechnic Linux Community cadres.
- Carrying out regular data collection and monitoring of Polytechnic Linux Community cadres.
